The Clarity overbed light fixture is specifically designed for the healthcare patient room and is installed over the patient’s bed. By incorporating reading, ambient and examination lighting in one unit, the Clarity unit is designed to enhance the comfort of the patient and meet the needs of the healthcare provider.

The Clarity fixture utilizes a unique Convenience Switching feature (optional) which provides instant patient exam lighting with a single adjustment by tilting the upper lens forward.

The body and top exam sections are constructed of extruded aluminum. The end plates are stamped aluminum, with handles made from die-cast aluminum. The lenses are 50/50 high-impact acrylic or optional polycarbonate material. The standard finish is Surf.

**NIGHT LIGHT**
The single-watt LED night light gives enough visibility to navigate the area, check equipment or read a chart without disturbing the patient. Activated by a rocker switch.

**INSTALLATION & MOUNTING**
Installation is made easy by the use of a mounting plate with a quick disconnect. The fixture is mounted to the backplate as one unit.

**MAINTENANCE**
Designed for ease of maintenance. No tools required to relamp the fixture. When maintenance is required, the ballast cover is easily removed to allow access to ballasts and wiring.
ORDERING INFORMATION

Below is an example of a typical complete fixture number with popular options:

**MDL-C4LV22LEDSC-T5-120**

**Series**
- MDL-C3: Nominal 3’ fixture length
- MDL-C4: Nominal 4’ fixture length

**Switching**
- LV: Solid-state Low Voltage Controller (LVC) for patient control of either or both circuits through remote momentary contact switches or nurse call handset by others.
- PC: 4-position pull chain (L,R or C)
- SX: No switch

**Lamp Configuration**
- 22: 2 up, 2 down

**Options**
- LED: LED chart light, bottom-mounted with rocker switch on the end (specify R-right or L-left)
- CS: Convenience switching (now available on all fixtures)

**Lamp & Ballast**
- T5: 4’ – 28 watts, 3’ – 21 watts
- T8: 4’ – 32 watts, 3’ – 25 watts

**Voltage**
- 120: 120 volts
- 277: 277 volts (not available with pull chain)

### TECHNICAL SPECIFICATIONS

**Construction**
Extruded aluminum body and top exam sections

**Stamped aluminum end plates**

**Die-cast aluminum handles**

**Nominal 4’ fixture length standard; also available in nominal 3’ fixture length**

**Lenses**
High-impact acrylic

**Lamps**
T5 (also available in T8; ask your representative for further information)

**Lamp Configuration**
2 up, 2 down

**Voltage**
120 or 277 Volt

**Bed Stop**
Standard on all units, this feature disrupts power to the hospital bed if medical equipment comes in contact with the light fixture

**Standard Finish**
Surf, powder coated

**Labels**
UL® and cUL certified for patient vicinity use

Approved for damp location use
