

# Laser Operator

**FLSA Status:** Non-Exempt, N1

**EEO Group No.:** 6

**Job Title:** Laser Operator

**Department:** Production

**Reports To:** Department Lead

## Summary:

This position entails the preparation, machining, and verification of hospital patient care assembly components. Individual selects and runs programs on a laser machining center and verifies conformance of finished work-pieces to specifications and standards.

## Essential Duties and Responsibilities:

- Gather, organize, and prepare material specified on shop drawings and/or program requirements
- Keep lasers constantly running during working hours by planning ahead and maintaining appropriate levels of materials needed
- Load material, select/start specified program(s), monitor laser performance, and unload material
- Verify conformance of cut material with specifications
- Clean, sand and deburr any cut parts to facilitate the assembly process
- Confirm quantity and organize completed work-pieces as per instruction
- Measurements scrap and submit to computer on day by day basis
- Maintain (5s)
- Confer with other machinists and supervisors to identify and resolve problems
- If laser machines are running a long program and operators have spare time, they should assist with other laser department duties
- Complete other tasks as directed by supervisors
- Follow all procedures and work instructions as documented by the Quality System.
- Report and/or document any Quality problems with products or procedures to supervisor or Quality personnel.
- Suggest improvements to product design and/or procedures/work instructions as needed.
- Comply with the Company's regular and timely attendance requirements.

## Prerequisites and Qualifications for Position:

- High school diploma or equivalent
- One year experience as a laser operator (or equivalent)
- Good reading/writing skills
- Good mathematical and computational skills
- Fluent in the English language

## Physical Demands:

This position requires an individual in good-to-excellent physical condition, able to meet the following requirements:

- Work in a typical non air-conditioned shop/warehouse environment
- Lift up to 50 pounds and do so repetitively throughout the shift
- Perform repetitive motions such as bending, twisting, etc.
- Spend a majority of the shift standing
