# MULTI-DIMENSIONAL COLUMN

## Applications:

- Intensive Care Areas
- PACU
- NICU
- ED/Trauma
- Cardiovascular
- Special Procedure Suite

## Product Features

- 1 Multiple equipment management tracks for unlimited flexibility — ample space for supply storage.
- 2 Ergonomically correct service outlets and accessories with easy-to-reach medical gases and electrical services.
- 3 Monitor channel reduces monitor overhang
- 4 Back of the column provides extra storage for organization of everyday materials and equipment

## Clinical Benefits

- Creates a safe and effective work area
- Nurses do not have to reach over the patient's head to add/change equipment
- Nurses can add equipment easily as the patient's condition changes
- Nurses can easily and quickly position all equipment
